Federal Employee positions are one of the few markets that are still hiring all over the country. You may be thinking about changing your current position due to cutbacks in budgets, wishing to advance your career or contemplating moving altogether. If you are thinking about making change (or are forced to change) you must make sure you know how to properly prepare your federal resume...even if you are already a federal employee and are applying for a transfer or new positions.

There are many common mistakes that are made when developing and writing your resume and you must avoid and these are just a few...

- *Listing Responsibilities Rather than Skills and Results*
- *Not Being Specific Enough as to What You Have Accomplished*
- *Not Including Key Words and Ignoring Soft Skills*

- *Omitting Required Information and Using an Objective Rather than a Career Summary*
- *Including Outdated Information and Being Too Modest*

“In today’s challenging job market, especially the federal job market, this new interactive resume book is a must have and is guaranteed to help you, whether you are writing a new resume from scratch, making minor changes depending on the position you are applying for or just fine tuning and error checking it.”
